State Revenue		
State Expenditures	Minimal Workload Increase	
FTE Position Change		
Appropriation Required: None		

** This summary shows changes from current law under the bill for each fiscal year.*

Summary of Legislation

Under Colorado's renewable energy standard, retail customers whose property is not well suited for on-site generation may buy output from a centrally located distributed generation facility with other subscribers. These facilities are known as community solar gardens (CSG's).

Current law requires subscribers to live in the same county as the CSG with one exception. If the subscriber's county has less than 20,000 residents, the CSG may be in an adjacent county as long as that county also has less than 20,000 residents. This bill, ***as amended by the House Transportation & Energy Committee***, eliminates these population requirements.

State Expenditures

Department of Regulatory Agencies, Public Utilities Commission (PUC). The amended bill requires minor conforming changes to the CSG portion of the PUC's renewable energy standard rules to delete county population requirements. As such, the workload impact is minimal, and no additional appropriation is required.

Effective Date

The bill takes effect upon signature of the Governor, or upon becoming law without his signature.
