Transfers the rights, powers, duties, and functions of the following state agencies to the office of information technology (office) in the governor's office:

- ! The general government computer center, from the department of personnel;
- ! Telecommunications coordination, from the department of personnel;
- ! State archives and public records, from the department of personnel;
- ! The office of the chief information security officer, within the governor's office.

Limits the office's oversight to IT in the executive branch agencies and not the legislative or judicial departments.

Specifies that the employees of those state agencies whose employment is deemed necessary by the chief information officer of the office (CIO) shall become employees of the office.

Requires the office to coordinate with and provide assistance, advice, and expertise in connection with business relationships between state agencies and private sector providers of information technology (IT) resources. Specifies that the office oversees and supervises the maintenance of IT and the initiation of any IT updates or projects and initiates all procurements of IT resources for state agencies, other than the legislative department, and enters into the agreements or contracts in connection with those procurements.

Consistent with the office's overall IT project oversight and procurement for state agencies, eliminates the provisions governing and distinguishing major automation system development projects.

Exempts emergency acquisitions or purchases of IT resources by the office from the state procurement code. Authorizes the office to promulgate rules specifying the criteria for such acquisitions and purchases.

Requires state agencies to cooperate with the office in developing and implementing processes for the sharing of data and information with the office and between state agencies. Directs that the office determine and implement statewide efforts to standardize and determine ownership of IT resources among state agencies.

Requires the CIO to prepare and submit budget requests for all IT resources to be utilized by state agencies and to develop policies and procedures for state agency requests for IT procurements of any amount,

instead of those exceeding \$100,000. Adds to the duties and responsibilities of the CIO supervision of the chief information security officer and the authorization to hire or retain contractors, subcontractors, advisors, consultants, and agents that are deemed advisable or necessary, including those to provide legal advice or legal services, research and development activity, or strategic planning services.

Makes the position of CIO a member of the governor's cabinet.

Transfers the chief information officer of each state agency and certain employees of those agencies to the office by a specified date and makes each an employee of the office. Specifies that each chief information officer transferred to the office may continue to act as the information officer for the state agency from which he or she was transferred. Makes each chief information officer subject to the immediate supervision of the CIO. Exempts the chief information officers in the legislative and judicial departments from transfer to the office. Specifies that a transferred chief information officer and the employees under the supervision of that information officer may continue operations at the location of the information officer's state agency.

Transfers all duties and responsibilities for statewide geographic information system coordination from the department of local affairs to the office. Directs the office to develop a statewide geographic information system plan by a specified date and to submit the plan to the governor and to the state, veterans, and military affairs committees of the senate and the house of representatives.

Creates the information technology revolving fund. Directs that moneys in the revolving fund be continuously appropriated to the office to pay the costs of consolidation and information technology maintenance and upgrades. Requires that any moneys appropriated from the general fund to the office or a state agency for the 2008-09 fiscal year and for each fiscal year thereafter for the procurement of information technology resources or major automation system projects, which moneys are unexpended or unencumbered as of the close of the fiscal year as a result of savings achieved by the office or state agency in connection with such procurements, shall not revert to the general fund and shall be transferred to the revolving fund.

Makes conforming amendments. Deletes obsolete language. Defines terms.
