shall be calculated using data from the most recent federal decennial census at the county, municipal, or block levels and that the calculations that require the use of block level data shall include the entire population of each block in which the enterprise zone is included. In addition, the bill increases the population limitation for an urban enterprise zone from 80,000 to 115,000 people and increases the limitation for a rural enterprise zone from 100,000 to 150,000 people to account for population growth that has occurred since 1986 when the population limits were established and to account for new standardized methodology.

Currently, the state auditor is required to use 6 broad economic indicators when evaluating the effectiveness of the act in an audit. The current factors are too broad to be utilized to determine the impact of an enterprise zone. The bill eliminates the requirement that the state auditor use the 6 indicators and instead creates a new pre-certification process that a taxpayer is required to follow if the taxpayer intends to claim an enterprise zone income tax credit pursuant to the act in order to demonstrate that the act has an impact on the taxpayers' decisions.

Currently, a taxpayer's business may earn an income tax credit pursuant to the act by:

- ! Being located in the enterprise zone; and
- ! Performing an activity that is eligible for an enterprise zone income tax credit, regardless of whether the availability of the income tax credit had any demonstrable impact on the taxpayer's decision to start, relocate, or expand the business in the enterprise zone.

The bill requires a taxpayer to complete a pre-certification process prior to beginning and completing any activity for which a taxpayer intends to claim an income tax credit pursuant to the act to ensure that the income tax credits allowed pursuant to the act have an impact on taxpayers' business decisions. The bill directs the department of revenue (department) to include a section for the pre-certification data on the enterprise zone income tax credit certification forms that the department currently uses.

Currently, some enterprise zone administrators charge a fee to programs, projects, and organizations (contribution projects) that have been approved by the Colorado economic development commission (commission). Current statute does not provide any authority or limitation regarding the fees, and, consequently, the fee policies vary from one enterprise zone to another. The bill requires each enterprise zone administrator that charges fees to create a policy regarding the fees and to submit the policy to the commission for approval. The commission must review each policy submitted by an enterprise zone administrator.

The bill directs the Colorado office of economic development (office) to work with the commission and the department to develop the

capability, if there is no fiscal impact, to allow taxpayers that intend to claim one or more income tax credits pursuant to the act to submit pre-certification forms, certification forms, and required reporting information in an electronic format.

The bill requires the department to aggregate and report data collected regarding tax credits claimed pursuant to the act, categorized by the date that the tax credit was authorized, the specific tax credit allowed pursuant to the act that each taxpayer was authorized to claim, and the total amount of the tax credits claimed for each tax credit allowed pursuant to the act. The bill requires the department to submit the data to the office on an annual basis.

1 *Be it enacted by the General Assembly of the State of Colorado:*
