

Local Government Impact

This bill is expected to have a minimal impact on local school districts, counties that operate recreation centers, and recreation districts. The Colorado High School Activities Association has already adopted these requirements for high school athletics. This bill extends the requirements to middle and junior high schools, and non-school-based youth athletic programs. The training is offered on-line, free-of-charge and takes less than one hour to complete, so the impact is only for the coaches' time.
