CC: Eddiekochman@aol.com

Mr. Schatz,

Sorry for this last minute comments related to this Review Committee.

However, Park County has an interest in how & what legislation will come from this committee's review.

There has been recent legislative actions taken to support & fund Forest Treatment & resource management.

Some more effective steps should focus on prevention.

Such as but not limited to;

- Mandatory setback requirements from Tree line perimeters and structures.
- Mandatory change in building codes to include flame resistant building materials for all new construction & remodels of existing structures.
- Standard defensible space rules.
- No build zones specific to identified extreme fire danger areas.
- Funding for Fire Wise communities.

I would request if for some reason I cannot make the meeting tomorrow. That Mr. Kochman read my comments in the record.

Regards,

Tom Eisenman

Park County Administration Officer
