The Colorado new energy improvement district (district) currently allows for financing of the completion of new energy improvements only for residential real estate. **Section 2** of the bill allows owners of commercial property to utilize such financing, repeals the maximum 95% loan-to-value requirement for qualified applicants, and repeals the percentage-of-value and dollar caps on allowable new energy improvements. Section 2 also includes fuel cells within the definition of "renewable energy improvement" and includes improvements that increase the overall illumination of a property or bring the property up to building code within the definition of "energy efficiency improvement". **Section 3** directs the governor to appoint 5 members to the district board by September 1, 2013, modifies their qualifications, removes the legislative appointees from the board, and reduces the quorum from 6 to 4 members.

**Section 4** directs the district to develop:

- ! A program for the financing of new energy improvements by private third-party financing in addition to by district bonds; and
- ! The parameters for requiring consent in all cases by existing mortgage holders to subordinate the priority of their mortgages to the priority of the district's lien.

Current law includes increased market value and decreased energy bills attributable to a new energy improvement in the calculation of the amount of the special assessment; **section 5** repeals these factors from that calculation and also repeals language that allows special assessments to be prepaid.

If district special assessments are attributable to new energy improvements that were financed by a private third party:

- ! **Section 6** directs the board to credit the proceeds of the special assessments to the private third party; and
- ! **Section 7** specifies that district bonds are not payable from the special assessments.

Section 6 also prohibits county assessors from taking into account any increase in the market value of the eligible real property resulting from the completion of a new energy improvement when assessing the value of the property. Section 7 also affirms that the state will not impair the rights or remedies of private third parties that have financed new energy improvements.

Current law conditionally repeals the district on January 1, 2016. **Section 8** repeals the repeal date.
