

As a concerned parent of 2 children I wanted to ask <sup>that</sup> support for HB 1288 be withdrawn. I have emailed the committee my comments and wanted to reiterate that as a PBE parent I spend a great deal of time & effort self-educating on vaccine use, and their risk factors and alternative ways to boost immune response in my children.

There is certainly no need to coerce me into vaccine education. I contend that most PBE holders seek ways to nurture healthy children. For us a more accurate description for PBE would be a Personally Informed Exemption. I join many parents present at the Capitol today asking you to make no changes to Colorado's PBE as it exists.
