

3/13/14

My name is Nancy Markow & I am unable to stay since the time for the hearing has been extended.

My concern is the honoring of choice. As a parent of two daughters, I ~~choose~~ a health care focus that did not include vaccines. Vaccines carry a risk factor that I was not willing to take. Instead I ~~choose~~ to support health rather than vaccinate with it's health risks.

From kindergarten thru college I was told I must vaccinate in order to have my daughters enrolled. No other options were given & I was bluntly told no other option existed.

It was up to me to educate the staff at school of the opt-out paperwork & stand up for my choice.

This bill will further restrict what is a personal choice in healthcare. It is one sided (only sharing the pro-vaccine literature & points of view)

I reach out to each of you to vote down this bill based on our country's basic founders' right of choice & honoring diversity

My daughters are now 29 & 27, they have always been & continue to be healthy. Many of their vaccinated peers have not been so fortunate. They are educated, one with her Phd & the other a graduate of medical school. They ~~will~~ choose not to vaccinate based on education; considering how true health is better accomplished with food, mental, emotional & physical choices

Please protect health by saying no to this bill.
