HB 15-1163 Contingent Repeal Hlth Ins Laws Aligning With ACA Support  
In 2013, the general assembly enacted HB 13-1266 to align state health insurance laws with the requirements of Obamacare. The bill adds an automatic repeal to multiple provisions in the state health insurance laws that is triggered if the comparable federal law requirement under Obamacare is repealed by congress and approved by the president. Yes, that's quite the long shot, but we can dream, can't we?

This legislation supports the principles of:

- Individual Liberty
- Personal Responsibility
- Free Markets
- Limited Government
- Fiscal Responsibility
