**TITLE:** CONCERNING THE DISCRETIONARY AUTHORITY OF COOPERATIVE ELECTRIC ASSOCIATIONS TO ESTABLISH REASONABLE GRADUATED RATES FOR INCREASED ENERGY CONSUMPTION BY RESIDENTIAL CUSTOMERS.

### Summary of Legislation

This bill authorizes cooperative electric associations (CEAs) to approve any revenue-neutral rate, charge, service, classification or facility that establishes a graduated rate for increased energy consumption, for energy conservation and energy efficiency purposes, by residential customers. The bill specifies that the implementation of such rates must give due consideration to impacts on low-income customers. Finally, the bill allows associations to utilize community energy funds for energy efficiency, energy conservation, weatherization, and renewable energy purposes. The Governor signed the bill into law on April 22, 2009, and unless a referendum petition is filed, the bill will take effect August 5, 2009.

### Assessment

This bill authorizes CEAs to implement graduated rates for increased residential energy consumption, and utilize community energy funds. Neither of these items will involve additional workload for the Colorado Public Utilities Commission or any other state agency. Thus, this bill does not affect state or local revenue or expenditures, and is assessed as having no fiscal impact.
