

**UPDATED SUMMARY  
SENATE BILL 14-103**

**Second Regular Session - Sixty-ninth Colorado General Assembly**

---

*This summary applies to the reengrossed version of this bill as introduced in the second house. It does not reflect any amendments that may be subsequently adopted. This summary reflects only the main points of the legislation.*

The bill defines a "watersense-listed plumbing fixture" as one that has been:

- ! Tested by an accredited third-party certifying body or laboratory in accordance with the federal environmental protection agency's WaterSense program;
- ! Certified by such body or laboratory as meeting the performance and efficiency requirements of the program; and
- ! Authorized by the program to use its label.

Current law requires water-efficient indoor plumbing fixtures in only 3 contexts:

- ! Builders of new single-family detached residences must offer the buyers toilets, faucets, and showerheads that meet the current standards of the WaterSense program;
- ! Tank-type water closets and flushometer toilets in new state buildings must meet certain standards that are either less stringent than or as stringent as the current WaterSense standards; and
- ! New construction and renovation of residential structures and office, commercial, or industrial buildings must meet standards that are less stringent than the current WaterSense standards.

**Section 1** of the bill prohibits the sale of *new* lavatory faucets, shower heads, flushing urinals, tank-type toilets, and tank-type water closets on and after September 1, 2016, unless they are a watersense-listed plumbing fixture. **Sections 2 through 5** amend or repeal conflicting portions of current law.
