Adopt standards for community wildfire protection plans (CWPPs) adopted by local communities pursuant to the federal "Healthy Forests Restoration Act of 2003" to promote greater consistency among CWPPs and facilitate the adoption of CWPPS by local communities, and to provide technical assistance to such local communities;
- ! Reduce wildfire risks by supporting the implementation of risk mitigation treatments that focus on protecting lives, homes, and essential community infrastructure and by improving inventory and monitoring of forest conditions, including by implementing a cost-share grant program and by hiring additional temporary field capacity;
- ! Support communities and land managers in moving from wildfire risk reduction to long-term ecological restoration;
- ! Support local business development and job creation through the implementation of forest treatments, including by administering a revolving loan fund to support woody biomass utilization, marketing timber products, and supporting the increased use of woody biomass in bio-heating;
- ! Issue a statewide request for proposals for loans to businesses to provide start-up capital for new facilities or equipment to harvest, remove, use, and market beetle-killed or other timber taken from private, federal, state, county, or municipal forest lands as part of a wildfire risk reduction or fuels mitigation treatment; and
- ! Improve outreach and technical assistance by adding full-time temporary staff and GIS capacity to assist with risk assessments and planning and by developing a web-based clearinghouse for technical assistance and funding resources.

Creates the healthy forests and vibrant communities fund (fund). Transfers \$2,950,000 from the operational account of the severance tax trust fund (account) to the fund for purposes of the act. Transfers \$50,000 each year from the account to the wildland-urban interface training fund for training for directors of fire protection districts.

Directs the air quality control commission to work with key regulatory and management entities, including the forest service and representatives of local health departments to identify barriers to the increased use of prescribed fire and recommend solutions to address those barriers.
