

DOR Suggestions

- To reduce taxpayer funds tied up in inventory, consider shifting the burden of fiscal risk from the taxpayer to the Non-profit. Taxpayers currently pay \$17,760 for 3,000 plates and programming.
- To standardize the process, consider requiring the organization to obtain the state certification letter prior to sponsoring a bill for a new license plate.
- To avoid destruction of plates that do not reach the statutorily specified 3,000 minimum issuance within 12 months, consider allowing plates to be retired only when the inventory is depleted.
- To avoid lawsuits against the state, consider not supporting amendments to existing group special license plates.
- Clean up 42-3-207 creation process
- Clean up 42-3-208 to remove retired plates
