Please support SB 15 - the ASSET Bill.

Well, this is the bottom line for one of the first Baby Boomers: I and millions more like me will be the big bubble in the population in the next 20 years and we need all the minds we can get! It is truly in all our best interest to nurture these young minds, talents and skills with the respect and dignity they so deserve, including a fair opportunity to attend a state institution of higher learning.

President John F. Kennedy, our first Catholic President, wrote a book just before he died: A Nation of Immigrants. In it he carefully detailed the various waves of immigration and the historic role they played in building this great country. Once outsiders, targets of bigotry and discrimination, unfair labor and housing practices, they ultimately became the mainstream and great leaders of our country in all areas: business, government, politics, science, the arts, education, sports, music and on and on. In 2012, we can write a new history of inclusion instead of harsh treatment by recognizing the invaluable contributions made and the potential contributions from which we will all gain in the future. Senate Bill 15 is a start!

Mrs. Chang, herself an immigrant from Taiwan with quite a heavy accent I might add, was one of our child's best teachers in elementary school. She had only one rule in her class: to be fair. Fair to oneself by working hard to be the best one can be, fair to classmates by providing good behavior to others and encouraging their success, and fair to community by working hard to make it the most successful possible. It is incumbent that we follow this rule in order to make Colorado and America the best educated and thus most productive that they can be.

So I encourage you to please be "fair" by voting for the ASSET Bill and all it represents in a very real way and the way it reflects America's true values and history. Thank you very much.

Respectfully,

Audrey Fishman Franklin (303) 443-2723
