Points to Consider

1. The bill reduces General Fund revenues by an estimated \$565,000 in FY 2009-10, and by \$1,130,000 in FY 2010-11. Based on the March 2008 Legislative Council Staff revenue forecast, there will be insufficient revenue for the annual H.B. 02-1310 transfers to the Capital Construction Fund and Highway Users Tax Fund. The revenue forecast estimates that there will be sufficient revenue to partially fund the S.B. 97-1 diversion, which will be reduced by \$565,000 in FY 2009-10 and by \$1,130,000 in FY 2010-11.
2. The bill was amended by the House Finance Committee to include a clause that if the revenue estimate prepared by Legislative Council in December projects revenues for the next fiscal year will not be sufficient to allow General Fund appropriations to grow by 6 percent then the credit authorized by this bill shall not be allowed for the next income tax year.

3. The House Finance Committee Report (referenced in Point 2 above) allows for a taxpayer who is eligible to claim a credit in a year in which the credit is not allowed to claim that credit in the first year that revenue will be sufficient to maintain the 6 percent growth of General Fund appropriations. If the credit is disallowed because of insufficient revenue to fully fund the 6 percent growth limit for several years, eligible taxpayers could claim several years of credits in that first year of recovery. In that first year of recovery, taxpayers claiming this credit for past years and the current tax year could increase the loss of revenue by as much as three to four times the amount specified in the fiscal note.
