Summary of Legislation

Recommended by the Joint Budget Committee, this bill transfers management responsibilities of the statewide disaster recovery center (E-Fort) from the Department of State to the Governor's Office of Information Technology (OIT) as of July 1, 2010. All personnel, property, contracts, and rules related to the E-Fort under the Department of State will also be transferred, although the Department of State will continue to provide its funding. Beginning in FY 2011-12, payment for the E-FORT's operating expenses will shift from the Department of State Cash Fund to the Information Technology Revolving Fund in the OIT over a period of 3 years.

State Expenditures

SB10-148 is not expected to change total expenditures, but shifts the funding source for their payment. Current costs for the E-Fort are \$2,353,020 and 2.0 FTE, paid in whole by the Department of State Cash Fund. Beginning in FY 2011-12, the bill reduces expenditures in the Department of State Cash Fund and increases expenditures in the Information Technology Revolving Fund by an equal amount.

The OIT will recover its costs from state agencies through central appropriations in the annual budget process. Based on the OIT's current funding mix, it is estimated that 60 percent of the funding will be General Fund and 40 percent will include federal funds and various cash funds. Table 1 shows the transition of funding for the E-Fort under SB10-148.
