department of personnel is currently responsible for developing guidelines and coordinating a performance system containing certain components. Employee salaries may be increased or left unchanged subject to available appropriations, and no annual increase in salary is guaranteed.

The bill phases in changes to the compensation system from a performance award based system to a system based on annual incremental rate increases in salary within an employee's pay grade or pay range for each position in the state personnel system.

Specifically, the bill requires the state personnel director (director) to adopt procedures for implementing annual incremental rate increases in salary based on employee performance and core job competency requirements. The director's annual report to the joint budget committee (JBC) on compensation must include the total dollar amount appropriated for personal services used to fund annual incremental rate increases in employee salaries.

The date by which the director must submit to the governor and JBC of the general assembly the annual compensation report and recommendations and estimated costs for state employee compensation for the next fiscal year is changed from August 1 to October 1 of each year.

For the 2012-13 fiscal year and each fiscal year thereafter, the recommended changes to salaries and any adjustments to the recommended changes made by the general assembly in the annual general appropriation act shall be effective on July 1 of the ensuing fiscal year unless the general assembly, following the adoption of a joint resolution declaring a fiscal emergency and approval thereof by the governor, acting by bill, does not appropriate moneys to implement the recommended changes to salaries and any adjustments to the recommended changes for that fiscal year.

On or before July 1, 2010, the director shall establish a pay plan that specifies 12 annual incremental salary rates within the pay grade or pay range for each job classification in the state personnel system. The salary rate within the applicable pay grade or pay range is specified for employees in the state personnel system who were hired prior to January 1, 2001, and on or after January 1, 2001.

For the 2010-11 and 2011-12 fiscal years:

- ! An employee of the department of public safety or of a department of state government or an institution of higher education that has implemented the incremental salary increase pay plan may advance to a higher salary rate within the employee's pay grade or pay range for the employee's position based on a satisfactory performance evaluation;
- ! A salary increase for an employee attributable to the

movement to a higher salary rate within the employee's pay grade or pay range shall be funded from an amount appropriated for personal services in the annual general appropriation act for the division, section, unit, office, or agency with which the employee is employed that is attributable to vacant classified positions, not to exceed 1% of the total amount of such appropriation;

- ! The amount of that personal services appropriation shall be utilized first to advance those employees who were hired on or after January 1, 2001, to a higher salary rate within the employee's applicable pay grade or pay range and, thereafter, to the extent any such amount is available, to advance those employees who were hired prior to January 1, 2001, to such higher salary rate;
- ! Upon the authorization of the governor, the attorney general, secretary of state, state treasurer, or the governing board of a state-supported institution of higher education, the respective department or institution shall implement the incremental salary increase pay plan for the employees of the department or institution in the state personnel system.

For the 2012-13 fiscal year and each fiscal year thereafter:

- ! An employee in the state personnel system may advance to a higher salary rate within the employee's pay grade or pay range based on a satisfactory performance evaluation and the achievement of the core job competencies established by the director; and
- ! Each of the principal departments of state government shall specify in the annual budget request for the department the amount necessary to advance the employees of such department to higher salary rates within employees' pay grades or pay ranges.

On or before July 1, 2013, the director and the executive director of each principal department, following consultation in good faith with state employee representatives and employee organizations, shall identify and establish core job competencies specific to positions in the state personnel system.

The director is authorized to adopt appropriate procedures to implement the bill.
