A BILL FOR AN ACT

101 **CONCERNING MODIFICATIONS TO CERTAIN ADMINISTRATIVE**
102 **FUNCTIONS OF THE DEPARTMENT OF PERSONNEL.**

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://www.leg.state.co.us/billsummaries>.)

The bill modifies various programs administered by the department of personnel (department) and makes changes to various administrative functions of the department as follows:

Appraisal of property to be purchased by the state. Currently, any state department, institution, or agency that plans to enter into an

agreement to purchase real property is required to get an independent appraisal for an estimate of the value of the property before entering into the agreement. The bill changes this requirement so that a state department, institution, or agency may enter into an agreement to purchase real property before getting an appraisal, so long as the agreement is contingent on an appraisal supporting the purchase price or value given by the state.

Recovery audits. The state controller is required to contract for recovery audits to recoup overpayments by state agencies of state or federal tax dollars for the 2007-08 through 2009-10 fiscal years. The bill expands the recovery audits to include the authority to recoup overpayments of moneys from fees, fines, gifts, grants, donations, and other sources and requires the state controller to contract for recovery audits for the 2010-11 fiscal year and each fiscal year thereafter. In addition, the bill creates the recovery audit cash fund and specifies that the moneys recovered from the audits shall be credited to the fund and used to pay administrative costs and contract fees and to return the remaining overpayment amounts to the source from which the overpayment was originally made.

State public financing issuance and post-issuance compliance. The state is responsible for certain compliance activities in connection with the issuance of tax exempt financing (issuance). The state controller has the primary responsibility to comply with state and federal compliance obligations, but the state attorney general, the state treasurer, and other state agencies are often involved in the issuance and post-issuance compliance. Currently, there is not a dedicated revenue source to fund the necessary state expenditures in connection with the compliance activities. The bill requires, to the extent allowed by federal law, that any new contract for an issuance shall assess a fee to be held by the trustee of the issuance and used to reimburse the state for costs incurred in performing or overseeing issuance and post-issuance compliance responsibilities. The bill creates the state public financing issuance and post-issuance compliance cash fund and specifies the circumstances under which the moneys held by the trustee shall be transferred to the fund and used to reimburse the state for its costs in performing or overseeing the issuance and post-issuance compliance responsibilities. The fund is exempt from the limitations on cash funds that are specified by law.

Inventory of the state's capital assets. The department is required to maintain an inventory of all of the state's capital assets valued in excess of \$100,000 and a separate inventory of computer equipment. The bill eliminates the requirement that the department maintain an inventory of computer equipment.

State employee workers' compensation account. The state employee workers' compensation account (account) exists as a separate

account in the risk management fund. Currently, the moneys in the risk management fund are continuously appropriated while the moneys in the account are subject to annual appropriation by the general assembly. The bill changes the annual appropriation of moneys in the account to a continuous appropriation for the purpose of paying claims from the account.

Emergency services volunteers. A state employee who is certified as a disaster service volunteer of the American red cross is allowed a certain amount of paid leave for specialized disaster relief services. Currently, the leave is calculated based on a 12-month period. In addition, a state employee who is a qualified volunteer who is called into service by a volunteer organization is also allowed a certain amount of paid leave. Currently the leave for these volunteers is calculated based on a calendar year. The bill changes the calculation of leave for all such employees to the leave year established by the employer to be consistent with the leave provided to other emergency services volunteers.

Annual compensation report. The state personnel director (director) is required to submit an annual compensation report and recommendations and estimated costs to the governor and the joint budget committee for state employee compensation for the next fiscal year. The department does not have all of the required data necessary to formulate a comprehensive recommendation by the current August 1 submission date. The bill changes the reporting date for the annual report and recommendations to September 15, when more data is available.

Overtime pay for essential employees. Pursuant to current law, an employee who performs certain essential services earns overtime pay based on the combined work hours and paid leave hours that exceed the employee's maximum hour limit. The bill eliminates this practice so that only hours actually worked are included in the calculation of overtime for all state employees, regardless of the services they perform.

Professional center development cash fund. The director is responsible for maintaining a training program for employees in the state personnel system and is authorized to establish fees necessary to pay the direct and indirect costs of the training program. Any fees collected in connection with the training program are credited to the professional development center cash fund. A portion of the moneys in the fund are reappropriated funds, because state agencies use moneys that have been previously appropriated to the agency to pay the department for the costs of conducting training programs. The fund also consists of cash funds. Currently, the moneys in the fund are subject to annual appropriation, and the bill changes the appropriation to a continuous appropriation. In addition, the bill specifies that the joint budget committee may require periodic reports regarding fund balances and expenditures from the director.

Group benefit plans - definition of "dependent". The bill

modifies the definition of "dependent" for purposes of the state employee group benefit plans. Specifically, the bill clarifies the circumstances under which a state employee may include his or her spouse, common law spouse, or child as a dependent. In addition, the bill clarifies that an employee may include his or her domestic partner as a dependent.

The state employee group benefit plans currently allow a child to be a dependent of the employee for purposes of group benefit coverage until the child turns 25. The bill increases the age until which a child or person for whom the employee is the major source of financial support may be considered a dependent for these purposes to 26 to comply with the requirement of the recently enacted federal healthcare bill. The bill also makes a conforming amendment in connection with the change in the definition of "child". The bill specifies that if federal law no longer requires coverage of a child until the age of 26, the state's definition of dependent will return to a child until the child turns 25.

Group benefit plans - state contribution for part-time employees. The director has the authority to adopt procedures to determine benefit eligibility requirements and the percentage of the state contribution to the health benefits premium for part-time state employees who are hired on or after January 1, 2005. The bill removes the January 1, 2005, date, and thereby authorizes the director to adopt procedures for benefit eligibility requirements and the percentage of the state contribution to the health benefits premium for all part-time state employees, regardless of the date their state employment began.

State employees' ideas that improve state government operations. The state employee incentive program (incentive program) rewards state employees for innovative cost-saving ideas by allowing the employees to share the cost-savings resulting from the idea. Currently, the incentive program does not allow employees of the department of personnel to participate. The bill allows employees of the department to participate in the incentive program and specifies that any employee whose work assignment includes identifying efficiencies and cost reductions in government expenditures may not participate. In addition, the bill requires the executive directors to advertise the incentive program during orientation for new employees and to submit an annual report to the state auditor containing a summary of certain information regarding all submitted ideas for cost-saving measures. The bill specifies that idea applications that do not require legislation shall be implemented no later than 180 days following acceptance of the idea application. In addition, the bill addresses how savings from idea applications will be distributed to institutions of higher education that are not enterprises. The bill also repeals the state employee incentive program that was enacted prior to the enactment of the program regarding state employees' ideas that improve government operations.

Fallen heroes memorial construction fund. The fallen heroes

memorial commission (commission) was established to erect memorials to commemorate the lives of Coloradans who died during specific military conflicts. All general fund appropriations and gifts, grants, and donations for such purpose are credited to the fallen heroes memorial construction fund. Currently, the moneys in the fund are subject to annual appropriation. The bill changes the appropriation to a continuous appropriation to the commission to be used for the purposes of the commission.

Electronic procurement program account in the supplier database cash fund. The department maintains a centralized database of businesses that are interested in providing goods and services to the state, and certain fees collected in connection with the database are deposited into the supplier database cash fund. In addition, the department maintains a statewide centralized electronic procurement system to create a more efficient delivery of state procurement services, and fees collected in connection with the procurement system are deposited into the electronic procurement program account, which was created within the supplier database cash fund. The bill eliminates the electronic procurement program account and requires that fees collected in connection with the electronic procurement system be deposited in the supplier database cash fund.

Procurement card program. The procurement card (p-card) program provides a rebate to the state on purchases that governmental bodies make with a p-card. The state controller allocates the total amount of the rebates received to each governmental body that made p-card purchases in proportion to the governmental body's contribution to the statewide p-card expenditures. Such allocations are applied as a reduction in the governmental bodies' administrative costs owed to the department. Currently, institutions of higher education are allowed to forgo participation in the p-card program. The bill allows such institutions of higher education, as well as political subdivisions of the state, to choose to participate in the p-card program as an affiliate. An affiliate is subject to the state's master agreement but may negotiate additional contract terms. The bill also requires the bank that issues the p-card to pay any rebates attributable to the institution or political subdivision directly to the institution or political subdivision. In addition, the bill requires such institutions of higher education to pay their indirect costs through alternate methods.
