The bill requires the department of higher education (department), in consultation with the department of labor, the department of regulatory agencies, and any other entity the department deems appropriate, to produce an annual report regarding state workforce projections and

education credential production. The report will project the workforce needs of the state for the next 3 years and the expected production of degrees and certificates over the next 3 years. The report will show the workforce needs that are not being met by state degree and certificate production and identify institutions, public or private, that can address those workforce needs through new programs or expansion of existing ones. Institutions of higher education are encouraged to use the report in master planning for its course of study offerings. The bill repeals July 1, 2016.
