education and the department of higher education that allows for the transfer of available student data relevant to the transition from high school to the postsecondary system. The procedure must utilize student unit record data currently collected and maintained by the department of education and administered at no charge to local education providers, public institutions of higher education, or students.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 hereby finds that:

4 (a) Previous work to align the sharing of data between state
5 agencies, including H.B. 08-1364, "Concerning interdepartmental data
6 protocols", and H.B. 09-1285, "Concerning the government data advisory
7 board, and, in connection therewith, creating the education data
8 subcommittee to make recommendations for creation of a statewide
9 comprehensive P-20 education data system", have provided dramatically
10 enhanced opportunities to inform stakeholders on the performance of and
11 opportunities in education;

12 (b) Systems that allow for the direct, electronic exchange of
13 student data from the department of education to the department of higher
14 education improve the understanding of student success rates related to
15 high school graduation and first-year student success in postsecondary
16 education as well as developmental education outcomes in postsecondary
17 education; and

18 (c) Enhanced data sharing between the department of education
19 and the department of higher education may enable future opportunities
20 for improving student outcomes and expediting the sharing of relevant
21 academic information, such as improving early awareness of college
22 readiness and transferring academic records electronically. These

1 enhancements promise to decrease the administrative burden for
2 institutions of higher education related to identifying students
3 matriculating from high school to the postsecondary system as well as
4 increase the accuracy of student information.

5 (2) The general assembly concludes, therefore, that:

6 (a) The department of education and the department of higher
7 education shall establish a procedure that allows the transfer of available
8 student data relevant to high school students' transitions to the
9 postsecondary system;

10 (b) This procedure should not create any additional financial or
11 administrative burden for local education agencies, public institutions of
12 higher education, or students; and

13 (c) This procedure should initially enable the exchange of relevant
14 data to which the department of education otherwise has access. The
15 procedure should be flexible enough to accommodate the exchange of
16 additional relevant data as the department of education's access to more
17 detailed data relevant to college admissions increases, with the long-term
18 objective of pre-populating admissions applications for students.
