specified information to clients during the initial client contact both orally and in writing. **Section 1** of the bill eliminates the requirement that mental health professionals disclose the required information orally.

Current law also requires mental health professionals, upon initial application or renewal of a license, certification, or registration, to pay a fee to fund the costs of the mental health professional peer health assistance program, the purpose of which is to provide assistance to a professional needing help in dealing with a physical, emotional, or psychological condition that may impact his or her ability to practice his or her mental health profession. **Section 2** of the bill modifies the program as follows:

- ! Requires the director of the division of professions and occupations (director) to annually review the fee amount and adjust the fee as necessary to reflect program usage, but not to exceed \$25;
- ! Requires a designated provider that is chosen to provide the program to take into consideration, when referring a mental health professional for treatment, the cost of the treatment and whether it poses a financial hardship on the professional, and, if so, requires the designated provider to consider alternative treatment or referral to a treatment program that offers a sliding-scale fee;
- ! Precludes the director from selecting a designated provider until each mental health board has provided input, and further precludes the selection of a designated provider until the boards and director obtain input from mental health professionals; and
- ! Requires a designated provider to notify the applicable board when a mental health professional successfully completes the program, and requires the board to reinstate the professional's license, registration, or certification upon successful completion of the program.
