(C-FAC) under the division of fire prevention and control (division) in the department of public safety and empowered the division to acquire firefighting aircraft for the C-FAC. Currently, the division has no such aircraft.

! For use during the 2014 fire season, the bill authorizes the division to purchase, lease, or contract for the use and operation of up to 3 firefighting helicopters.

! For use in the 2015 fire season and beyond, the bill authorizes the division to purchase, lease, or contract for the use of up to 4 large aircraft from the federal government or other sources. The division is further permitted to contract for the retrofitting, maintenance, storage, and operation of these planes. In awarding any such contract, the division is directed to consider certain specified factors, including whether bidders will perform the airplane modifications in Colorado or employ veterans.

The bill also allows the division to establish a center of excellence for advanced technology aerial firefighting and specifies the functions that the center must perform, if so established.
