waste tires.

The solid and hazardous waste commission will set the waste tire fee by rule in an amount not to exceed the current \$1.50 fee. In addition to the existing application of the fee to automobile tires, the fee will also be collected on trailer, truck, motor home, and motorcycle tires. On and after January 1, 2018, the fee is set at 55 cents per tire.

Until December 31, 2017, the fee will be distributed as follows: 30% to the waste tire administration, enforcement, and cleanup fund; 65% to the end users fund; and 5% to the waste tire market development fund. On January 1, 2018, the entire fee is credited to the waste tire administration, enforcement, and cleanup fund, and the end users fund and the waste tire market development fund are repealed.

The commission will set the amount of the rebate payable from the end users fund, not to exceed \$80 per ton in an amount that is: The same each month for each successive 12-month period; based on the monthly rolling average weight of waste tires submitted for a rebate during the previous 36-month period; and calculated to equalize, but not exceed, the amount of rebates paid with the anticipated income to the end users fund during each succeeding 12-month period. The department must pay rebates on a per-ton basis, and the commission's rules governing administration of the rebate must specify that:

- ! If the weight of waste tires submitted for a rebate in any one month multiplied by the amount of the rebate exceeds the balance of the end users fund, the department will pay a reduced per-ton rebate that month; and
- ! The department must quarterly notify end users of the date on which the balance of the end users fund is anticipated to be insufficient to pay all of the rebates applied for.

Rebates can be made to end users, retailers who sell tire-derived product, and processors of Colorado waste tires who sell their tire-derived product to out-of-state end users. To avoid double payment of the rebate, once the department has paid a rebate on a particular quantity of tire-derived product, every part of that particular quantity of tire-derived product is no longer eligible for payment of the rebate.

Waste tire haulers cannot have more than 1,000 waste tires on site or store a waste tire for more than 3 days. Waste tire generators cannot have more than 1,500 waste tires at any one time and must develop and maintain written criteria for distinguishing waste tires from used tires, clearly identify waste tires and used tires according to the criteria, and organize used tires for sale in a manner that allows the inspection of each individual tire. Waste tire collection facilities cannot have on site more than 7,500 waste tires at any one time. Waste tire processors cannot have on site at any one time more than the lesser of 100,000 waste tires, the amount of waste tires allowed under local requirements, or the amount of waste tires anticipated in the waste tire processor's financial assurance

instrument. Mobile processors of waste tires must register with the department.

Used tire sellers must distinguish waste tires from used tires, distinguish used tires being held for sale in Colorado from used tires being held for sale outside Colorado, and organize used tires for sale in a manner that allows the inspection of each individual tire.

Waste tire monofills must:

- ! On an annual basis, for every one waste tire received, end use at least 2 waste tires, process at least 2 waste tires into tire-derived product; and
- ! Not place any waste tires into monofill storage after January 1, 2018, and close the waste tire monofill by July 1, 2024.

The waste tire advisory committee is repealed.
