## **Bill Summary**

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <a href="http://www.leg.state.co.us/billsummaries">http://www.leg.state.co.us/billsummaries</a>.)

Beginning July 1, 2015, the bill allows a sales and use tax exemption for the sale, storage, and use of information technology equipment (IT equipment) that will be used in a qualified data center or a qualified refurbished data center. The bill includes IT equipment that is

purchased to replace or upgrade IT equipment and IT equipment that is relocated to the state. The bill requires that the IT equipment be used in a qualified data center or qualified refurbished data center within 20 years of the date of the sale, use, storage, or relocation of the IT equipment. The exemption applies to all IT equipment that is used and maintained within a qualified data center or qualified refurbished data center, regardless of whether the owner of the IT equipment is the owner of the qualified data center or qualified refurbished data center.

The bill specifies the criteria to be a qualified data center or a qualified refurbished data center and requires the owner of such a data center to certify to the Colorado office of economic development (office) that the data center satisfies that criteria. The office is required to determine whether a data center is a qualified data center or qualified refurbished data center and notify the department of revenue and the data center owner of such determination.

The office is required to submit a periodic report to the general assembly regarding the economic benefits of the sales and use tax exemption on IT equipment used in qualified data centers or qualified refurbished data centers. In addition, the office is required to make a presentation to the joint technology committee of the general assembly prior to finalizing the certification for any qualified data center or qualified refurbished data center.
