joint budget committee and the joint technology committee of the general assembly on or before November 1, 2014, and on or before November 1 each year thereafter.

In the first report, the office is required to include information about the office's information technology asset inventory and the office's refresh cycle schedule, including cost projections. The office is required to phase in over 4 years the contents of the report, which will ultimately include asset inventory and refresh cycle information for personal computers, including operating systems and productivity software, network infrastructure, servers, and nonproductivity software.

In the second report, the office is required to provide a prioritized list of all information technology requests that state executive branch agencies submitted for the applicable fiscal year. The report must include the name of each project for which a request is made and the purpose of the project, the initial and continuing costs associated with each project, and the project's adherence to the office's standards and policies.

In addition, to assist the office in creating the prioritized list required in the second report, the bill requires the office, in conjunction with the governor's office of state planning and budgeting, to create a working group to annually evaluate and prioritize all potential information technology-related budget requests from executive branch state agencies.
