Capital Development Committee. Section 1 grants the state controller authority, with certain specific requirements, to allow any department, institution, or agency of the state, including any institution of higher education, to expend moneys differently from the authority granted by an item of appropriation for a capital construction budget item if the capital construction, controlled maintenance, or capital renewal project that the appropriation was for requires a nonmonetary adjustment for its timely continuation and the nonmonetary adjustment is due to unforeseen circumstances arising while the general assembly is not meeting in regular or special session during which such nonmonetary adjustment would be legislatively addressed. Section 1 defines nonmonetary adjustment as a change that does not affect the amount of the appropriation, including a name change, an extension of time for completion, a scope change, a transfer between departments, or other such similar changes.

Section 2 includes an amendment to the arts in public places statute which currently requires each appropriation for a capital construction project to include an allocation of not less than 1% of the state-funded portion of the total construction costs to be used for the acquisition of works of art (1% requirement). This section specifies that the 1% requirement does not apply to a capital construction project that the capital development committee agrees does not meet the original purpose of the 1% requirement. This section also clarifies that a capital construction project for purposes of the 1% requirement does not include the installation of fixed or moveable equipment or the contracting of services of consultants to prepare construction plans.

1 *Be it enacted by the General Assembly of the State of Colorado:*
