**Bill Summary**

*(Note: This summary applies to this bill as introduced and does not necessarily reflect any amendments that may be subsequently adopted.)*

When a water judge issues a decree for a change of type of use of water rights that transfers more than 1,000 acre-feet of water per year, allows the water judge to include a term or condition that addresses decreases in water quality caused by the change if the change would cause an exceedance of water quality standards established by the water quality control commission that are in effect at the time of the decree.

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.  
*Capital letters indicate new material to be added to existing statute.  
Dashes through the words indicate deletions from existing statute.*

Directs the water judge to take into account all sources of pollutant contribution. Specifies that if an affected stream segment exceeds a water quality standard at the time of the application, the applicant is responsible for only that portion of the exceedance attributable to the proposed change of type of use.
