

Be it Enacted by the People of the State of Colorado:

Shall, so as to cut off terrorist funding through oil revenue, the state of Colorado immediately begin to upgrade its vehicles to engines that contain no moving mechanical parts (see simplified figures next page) consisting of an airfoil inside of a chimney structure, rotated so that its lift vector points horizontally, with compressed gas burned at the top of said chimney so that air is drawn up over said airfoil and forward propulsion produced, thereby greatly reducing the need for the weight of traditional piston driven engines and transmissions, thereby reducing the insane outflow of U.S. dollars to fund those who wish us harm, through an amendment to the Colorado Constitution?

STOP THE INSANITY!
