

Attachment G

To Susan Cox  
from Theresa Lamorie

Susan  
I'm writing this letter to  
dispell the fact that Chemo pills  
do not have side effects. They do.  
I was on heavy dose of chemo pills.  
I developed blisters on both feet I  
could not walk. I was in a wheel  
chair. I got it as far as the bathroom  
door & had to crawl the rest of the way.  
It was very difficult. I was like  
this for a month. Dr Hyde put me  
on a lower dose but that didn't  
help. I was able to take the pill in  
two week stages because I was getting  
the blisters again. I am now on  
intravenous and have had no side  
effects.
