

## FY 2010-11 Two-Year Projection of Cash Need

### University of Northern Colorado

Project Name	LEED Certification	Amount	Fund Source
<b><i>Athletics Strength and Conditioning Addition</i></b>	TBD	<b>\$3,500,000</b>	CF

2009-119

The project constructs an 11,000-GSF, single-story addition on the south side of Butler Hancock Hall, which will house the Strength and Conditioning program within the Department of Intercollegiate Athletics, along with several cooperative programs from the School of Sport and Exercise Science. The university says the current strength and conditioning facilities, measuring 2,500 GSF, are too small to serve its 450 student-athletes.

The source of cash funds for the project is gifts and donations. A capital campaign by the UNC Foundation is currently underway.

<b>Total Projection of Cash Need</b>	<b>\$3,500,000</b>
