

The Colorado Association for School-Based Health Care advocates for health care in schools for Colorado's children and adolescents. Established in 1996, CASBHC is a 501(c)(3) organization. CASBHC provides policy leadership, training and technical assistance, quality assurance and evaluation.

Our Vision

Colorado's children will have quality, integrated school health services that improve health status, optimize academic achievement, and enhance well-being.

Our Mission

Keeping children healthy, in school, and ready to learn.

Our Core Values

We believe that every child should receive the care necessary to optimize health and well-being.

We believe that preventive and primary health care should be available where children are, in school.

We believe that good health is essential for student success and that delivering health care in schools will improve academic achievement.

We believe that school-based health centers provide children with the tools they need to make healthy choices now and in the future.

We believe that children will not care what we know until they know that we care.
