Dear Ms. Levy,

I heard Ryan Warner's interview with you about your proposed bill to stop "hands-on" cell phone use, if you will, while driving.

I am a motorcyclist. I'm writing because I believe you will find large support for your bill in the motorcycling community. More often than not, if someone pulls out in front of us or is driving erratically, it is because the driver is on the phone. Being cut off or almost having an accident with a driver who is on the phone is a common conversation among motorcyclists, and in my experience has increased the already inherent dangers of riding a motorcycle. There are many motorcycle clubs in Colorado where I think you would find support for your bill.

Good luck.
